

## Course Guide

### Postgraduate Diploma Children & Young People's IAPT Therapy: Systemic Family Practice

#### What does training involve?

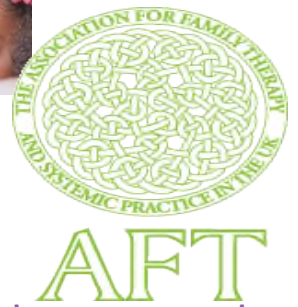

The Postgraduate Diploma in CYP IAPT Therapy in Systemic Family Practice (SFP) starts in January 2022 and will be completed over 1 year, finishing December 2022. Students attend university teaching on Mondays and Tuesdays over three terms. For the remainder of the week you will be seeing young people and their families in your service where you will be applying what you learn on the course.

#### Summary of Systemic Modules

The Systemic Family Practice course has two stands: Depression & Self Harm and Conduct Disorder **OR** Eating Disorders. All students begin with a Basic Systemic Skills module which will introduce a range of systemic approaches for working with families from diverse socio-cultural backgrounds and where you will learn a range of systemic techniques and interventions. You will continue on to modules focusing on either Adolescents with Depression and Self Harm and Conduct Disorder or Adolescents with Eating Disorders.

To help you develop and embed your developing skills, you will be required to video record your own practice and review recordings in small, safe and supportive practice tutor groups. We receive consistent feedback that this is a highly valuable part of the course.

Teaching will be delivered through a combination of online and face-to-face contact depending on Government restrictions.

#### How many cases do I need to see to complete the training?

You will need to see at a minimum 8 cases over the course with 2 cases for the Basic Systemic Skills module and 3 cases per specialist module. You will be assessed on these through written and video presentation. You will need to accrue at least 60 hours of systemic practice working directly with families and receive supervision on each case.

#### What support will I have at my new service?

You should have a minimum of 1 hour a week SFP supervision from a UKCP registered, AFT Approved Systemic Supervisor. If your SFP supervision is provided externally to your service, you must also have at least 1 hour a month case management supervision within the service, to support you with identifying appropriate cases, assessments, managing risk and monitoring outcomes, with good communication between supervisors.

#### What will I gain from the training?

The skills and knowledge you develop will enable you to work more effectively and confidently with young people and their families. **The course is accredited by the Association for Family Therapy as an Intermediate Level training in Systemic and Family Practice.** Graduates are eligible to apply for the final two years of family therapy training leading to registration with United Kingdom Council for Psychotherapy as a Family and Systemic Psychotherapist.

## Assessment of Modules

Students will be assessed through written case reports, whole session video recordings with reflective analysis, a theory-oriented case report, a participation assignment and a portfolio which includes a clinical log.

## Caseload Requirements

Unit	Case Requirement
Basic Systemic Practice	2 children/young people and their families. A minimum of 12 hours of clinical practice
Systemic Family Practice for Depression/Self-Harm	3 young people and their families where the young person presents with depression/self-harm. A minimum of 24 hours of clinical practice.
